

THE METAMYTH OFFER: EXCALIBUR

REVOLUTIONARY STORYTELLING FOR A NEW WORLD

Another World Is Possible has forged Excalibur—a mythic storytelling system born from the meteoric refuse of a broken world. Beyond the hollow cycles of traditional branding, marketing, and sales, we’ve reclaimed humanity’s oldest technology for transformation: Story.

THE END-TO-BEGINNING STORY SYSTEM

Our Metamyth process creates a living narrative ecosystem:

1. Extract Your Soul Story — We excavate the essence that makes you uniquely you, revealing the original vision buried beneath metrics and market positioning
2. Create Your AI Oracle — A living intelligence system that generates authentic materials while preserving your wisdom in an evolving form
3. Transform Your Identity — Beyond cattle brands to soul-level resonance that naturally attracts the right people
4. Map The Intertwined Journey — Both your evolutionary path and your audience’s quest, creating fractal patterns of engagement and transformation

BRANDS ARE FOR CATTLE. STORIES HAVE SOUL.

We translate your purpose into omnipresent identity—giving your organization a living mythology that naturally attracts the right characters into your story. This isn’t just branding; it’s remembering who you truly are and inviting others into that remembering.

THE QUEST

Forget customers. Think characters in your evolving story. We map the archetypal journey that brought you here and create pathways for others to join that journey:

- The Call to Adventure — What crisis or opportunity demands response?
- The Quest — What planetary purpose guides your existence?
- The Vision — What world becomes possible through your work?
- The Journey — What path transforms vision into reality?
- The Kindred Quest — How do others find themselves in your story?

CONTENT PROGRESSION: FROM MYTHOS TO COMMUNITY

We craft a strategic progression of content that guides people deeper into your story:

THE BRAND MYTHOS: CINEMATIC INVITATION

At the heart stands your Brand Mythos—a super-concentrated, beautiful 3-5 minute cinematic piece that captures your essence. This isn't disposable content but an enduring artifact—a sword in the stone that calls the right people to pull it free. This cornerstone asset serves as the gravitational center of your entire content ecosystem.

THE EXPANDING STORY SYSTEM

From this powerful center, content expands in concentric circles:

1. The Invitation — Accessible content that introduces who you are and what you're doing, creating entry points for various audience segments

2. The Illumination — Strategic videos addressing common questions, concerns, and objections—meeting people where they are with clarity and depth
3. The Evidence — Case studies, testimonials, and impact stories that demonstrate your story coming alive in the world
4. The Community — User-generated content, community stories, and collaborative creations that extend your narrative through authentic voices

This isn't random content creation but a meticulously designed ecosystem—each piece serving a specific purpose in the archetypal journey from first encounter to full participation.

ENDURING ASSETS, NOT DISPOSABLE CONTENT

This batch of congruently captured content creates lasting assets that serve you for years—not throwaway posts lost in the endless scroll. Each piece remains relevant because it's anchored in timeless story patterns rather than fleeting trends.

This foundation opens the door for your own ongoing content creation—podcasts, social media, newsletters—all optimized around your core story for maximum resonance and cohesion.

MAPPING THE JOURNEY: THE ARCHETYPAL FUNNEL

Traditional marketing funnels focus on moving prospects toward transactions. Our Archetypal Funnel transcends this limited model, creating a multidimensional pathway for participation that mirrors your own evolutionary journey:

- Awakening — Strategic media that helps people recognize the call to adventure, shifting from passive consumption to active engagement
- Alignment — Content that connects their individual purpose with your collective mission, building resonance and recognition
- Activation — Clear pathways for meaningful participation that transform interest into action and audience into community
- Amplification — Systems that turn participants into co-creators, extending your story through their unique expressions

- Actualization — Feedback loops that evolve the story through collective impact, completing the cycle and beginning it anew

Each stage is supported by precisely calibrated video assets, interactive experiences, and engagement opportunities—creating a holistic ecosystem where your story naturally attracts and activates the right characters at the right time.

I particularly liked that line too. Let's keep it and build around it:

MULTI-DIMENSIONAL VALUE FLOWS: BEYOND BUYING TO BELONGING

People don't just want to buy things. They want to buy INTO something. Our approach transforms traditional sales into meaningful participation within your larger story.

TRADITIONAL SALES, TRANSFORMED

- Story-Led Sales — Products become meaningful artifacts in your narrative
- Sales as Service — Connecting people with solutions they truly need
- Transaction as Initiation — Each purchase becomes a threshold crossing into deeper relationship and participation
- Exchange as Reciprocity — Moving beyond extraction to honor the ancient pattern of giving and receiving

CHOOSE-YOUR-OWN-ADVENTURE PARTICIPATION

We create multiple pathways for people to engage with your mission:

- Resource Support — Financial contributions through purchases, donations, subscriptions
- Skill Contribution — Volunteering expertise and capabilities
- Network Amplification — Extending your story through their connections
- Direct Action — Hands-on involvement in manifesting your vision

This creates an economic ecosystem that honors the full spectrum of human motivation—transforming customers into characters, transactions into transformations, and commerce into community.

COMMUNITY FUNDING ACTIVATION

The Metamyth System transforms traditional fundraising into story-powered resource attraction:

- Crowdfunding Amplification — Your story becomes magnetic, drawing supporters through emotional connection rather than mere transactions
- Subscription Magnetism — Patreon, Substack, and membership models thrive when anchored in archetypal narratives that turn followers into fellow travelers
- Grant Storytelling — Foundations and impact investors seek transformative narratives that articulate problems and solutions with mythic clarity
- Investment Attraction — Capital flows naturally to stories that demonstrate coherent purpose and authentic impact potential

RELATIONSHIP-DRIVEN REVENUE

Beyond traditional sales, we create multi-layered value exchanges:

- Story-Centered Commerce — Products and services become meaningful artifacts within your larger narrative
- Community-Powered Distribution — Community members naturally share and amplify offerings they believe in
- Value-Match Pricing — Adaptive pricing structures that align with both the value received and the purpose served
- Evolutionary Partnerships — Collaborative ventures that emerge organically from shared narrative fields

RECIPROCAL PARTICIPATION MODELS

Each level of engagement creates its own natural reciprocity:

- Witness Level — Audience members who support through attention and minimal resource exchange
- Supporter Level — Regular contributors through subscriptions, purchases, or donations
- Co-Creator Level — Active participants who contribute skills, networks, and resources
- Steward Level — Deep partners who share in both risk and reward

PURPOSE-FIRST PRICING & VALUE FLOW ECONOMICS

Our economic model is radically simple: we share in the value we help create. For organizations with genuine purpose, we begin with the essential—taking you through our core process to reveal your foundational story with minimal upfront investment.

We work to make your story resonant and attractive, calling in people, resources, and energy. Then we channel a percentage of what flows through this attractor field back to ourselves—creating direct alignment between your flourishing and ours.

This restores the sacred contract between creator and creation, focusing our creativity on generating genuine transformation rather than ephemeral artifacts. We're raising the stakes—raising you capital and raising you an army to solve the problems you're addressing through an evolutionary process that continually grows with you.

COMMUNITY OVER CUSTOMERS

Our approach ultimately dissolves the need for salespeople as community members themselves become enrolled in bringing others into the story. This creates reciprocal loops of value far beyond traditional sales—where audience becomes author, consumer becomes creator, and the story comes full circle.

THIS IS ANOTHER WORLD IS POSSIBLE

This approach ultimately transcends not just sales and marketing, but the entire game we're playing—eclipsing the gas fires of a bygone era in the brilliance of a new dawn. It's a

whole-system transformation that looks at your entire organization—your goals, dreams, visions, origins, purpose, destination, path, and how the people waiting for you can join your story.

This isn't just better business—it's a system that works better, feels better, and simply makes sense. It creates an ecosystem where value flows naturally to those who generate it, where relationships deepen organically through shared purpose, and where every transaction becomes transformational.

Good stories transform:

Unveil the possibility.

Broadcast the signal.

Invite the characters.

Tell the story.

Repeat.

This is the beginning.

This was always the story— comes together, save the world, make this life a free and beautiful adventure.
